Boaton-Transportation of Board of Trade.

Unmindful of the hot weather, the transportation committee of the board of trade, of which Henry F. Ulmer in the energetic chalrman, held a meeting Monday night, at which several matters were discussed.

The matter of having through tickets for travelers on the electric lines between New London. Norwich and Willimantic, instead of being obliged to dole out a nickel at every fare limit, has been under consideration for some time, but Chairman Ulmar was informed by the official to charge of that department that such could not be granted, owing to the clamor which would come from the rest of the state, it was therefore decided to bring the matter before the State Business Men's association and also before the state board of trade, with a view to having it carried out.

The committee is also working for the restoration of the train which used to arrive here with Boston connection about 2 o'clock in the afternoon, but which has not been run singe the trolleys were put on the Central Village line. There is now no connection from Boston by train between 11.48 and the 7.10, these being the time of arrival here.
